

ABSTRACT

5 Compounds, compositions and methods are provided for
modulating the expression of diacylglycerol acyltransferase
1. The compositions comprise oligonucleotides, targeted to
nucleic acid encoding diacylglycerol acyltransferase 1.
Methods of using these compounds for modulation of
10 diacylglycerol acyltransferase 1 expression and for diagnosis
and treatment of disease associated with expression of
diacylglycerol acyltransferase 1, such as obesity and
obesity-related conditions, are provided.
